EDUCATION

North West University

Bachelor of Information Technology majoring in computer science and information systems
Expected Graduation: May 2026
Current GPA: 70% average from completed modules

Magwagwaza High School

2014 – 2019
National Senior Certificate

SKILLS

Programming Languages: Python, C++, C#, Java

Frameworks / Platforms: .NET (C#/.NET Core)

Networking: Cisco routing and switching

Tools: Git, SQL, Linux, Agile methodologies

Soft Skills: Problem-solving, teamwork, communication

PROJECTS

SQL Databases

This project involved designing and managing a relational database using SQL queries. The goal was to gain a solid understanding of database systems and effectively address client requirements.

Software development

An E-commerce software development project where I applied the Software Development Life Cycle (SDLC) methodology to ensure a structured and comprehensive development process.

Computer networks Project

A group project focused on learning the fundamentals of computer networking. We used Cisco Packet Tracer to simulate and implement network designs, helping us better understand networking concepts.
